The ideal measurement is 28 5/8” on each of the short sides of the triangles. Find center of triangles (long side) and the pieced section of quilt by folding each in half and finger pressing a crease in the seam allowance. Match the creases and pin together. The length of the long side measures approx 39 3/4” at this point. Sew appliquéd corner sections to opposite sides of quilt first. Press to appliqué. Repeat on remaining sides.
